

Industry Synergetic Training Series "Sharpening Your Saw" CESPA-SYS II

centre for
energy studies &
policy analysis

We are happy to announce our new certification course in energy efficiency of pumping systems. CESPA is joining forces with industry Majors to enrich the professional knowledge with update from manufacturers on the state of the art technology.

The above course is a unique opportunity where in we are synergizing the capability of a manufacturer to provide hands on training on demonstration models with the understanding of the field requirement by a professional body. We believe it is first of its kind training in the country to foster and develop a hardnosed energy professional fraternity. All Energy Professionals are requested to avail this opportunity to equip themselves to be better positioned to perform the duties expected of them.

This course will be eligible for credit points leading to award of post graduate certification in energy management from CESPA.

SYS is planned as a one day non residential program at manufacturer's training facility.

CESPA-SYS II: Energy Efficient Pumping System

Industry Partner: **Grundfos Pumps India Pvt. Ltd.**

Training Center: CHENNAI

Faculty:

Well qualified engineers who have sufficient years of experience.

Topics:

1. Pump basic
2. Electrical basics
3. Pump selection
4. Grundfos Pumps overview
5. Tour of factory premises
6. Demo of various pumps of Grundfos
7. Pump testing

Timing: 9.30am to 6.00pm

Eligibility:

Members of Society of Energy Engineers and Managers (SEEM) are welcome to attend the course without any registration fee. But they are required to register with SEEM HQ. We encourage all Certified Energy Auditors / Managers to avail this opportunity to gather credit points as above. However, priority for location and batch will be extended to SEEM Members.

Batch Registration:

Two batches. The batches will be of 10 participants each. However two candidates in each location per batch will be waitlisted for accommodation against any cancellation. Registration will be on first come first serve basis.
